3. Don't Rush to Reach Home

Sometimes, waiting and blocking opponents is smarter than rushing your token to the home column.

4. Always Count Your Moves

Plan moves in your head to avoid getting captured. It's not just about what you roll, but how you use it.

5. Capture When Strategic

Capturing an opponent's token gives you an extra turn, but don't always chase them—play it smart based on your board position.

6. Trap Opponents with Two Tokens

Place two tokens near each other to corner and knock out advancing opponents. Works great in Ludo With Friends Online matches.

2. Focus on High-Risk Opponents First

If someone has 2 or more tokens in the home path, target their weaker ones on the board. Taking out a lead player early on increases your chances.

3. Switch Between Aggressive and Defensive Play

Flexibility is key in online Ludo. If you're ahead, play defensively and avoid risks. If you're behind, take aggressive chances and aim to capture.
